Abundant rainfall in July restored favourable seasonal conditions over practically the whole of the state.

2. WOOL.

Receipts of wool into Sydney to date are slightly below those in the corresponding period last season. Sydney auctions will open on 3rd September.

The course of wool prices is shown in Table 26. The average price realised for greasy wool sold at Sydney auctions in the year ended June, 1934, was 15·8d. per lb., as compared with 8·5d. per lb. in 1932-33.

3. WHEAT.

The area sown with wheat for 1933-34 was 4,948,000 acres, including 4,616,000 acres for grain. It is estimated that the total crop harvested in the State was in the vicinity of 55,000,000 bushels. On 11th August, 1934, the quantity of wheat grain stored in silos and on railway premises was 20,554,000 bushels. Of this quantity 7,289,000 bushels were on sites in the Metropolitan Area.

The course of wheat prices is shown in Table 26. The rate of disposals increased in July, but a large exportable surplus still remains unsold. The Minister for Agriculture announced that wheat at present stored in Government silos (approximately 15,000,000 bushels) must be removed by 15th October.

4. BUTTER.

The production of butter in 1933-34 was 16 per cent. greater than that of the former record season, 1932-33. Output in June declined from the record levels of the previous nine months.

* Revised.

The course of local butter prices is shown in Table 26. Export sales parity (Sydney) on 16th August, 1934, was 80s. per cwt. compared with 101s. per cwt. a year previously.

5. COAL.

The quantity of coal raised in 1933 was 7,118,000 tons compared with 6,784,000 tons in 1932 and 6,432,000 tons in 1931.

* Excluding bullion and specie.

The values of imports represent the cost f.o.b port of export plus 10 per cent., and are recorded in English currency. The values of exports are the values in the principal markets of New South Wales, less bonuses on butter, &c., and are recorded in Australian currency. The respective equivalent values in Australian and British currencies shown above are estimated.

* State Government banking transactions suspended. Index not ascertainable.

†Exclusive of certain abnormal Government transactions.

The index may be regarded as an approximate measure of changes in the volume of business transactions settled by cheques provided it is considered in conjunction with changes in price levels. It represents the ratio of each month's clearings to the average for the month concerned during the five years 1926-1930. This average is represented by 100 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels. The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

* Including new mortgages and renewals as registered.

The above comparison is affected by a decline in property values. Figures for individual months are shown in Table 50 of the Statistical Bulletin of New South Wales for June Quarter, 1934.

NOTE.—Mortgages and liens in some instances secure fluctuating advances, the amount of which is not recorded in the legal instruments. The amounts shown relate substantially to mortgages of fixed amounts for fixed periods, and include fluctuating advances (such as overdrafts) secured by mortgage. Mortgages providing collateral security of subsisting mortgages are included.

24. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and the group averages are the means of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. It represents the ratio of the average prices of ordinary shares to their par values.

Par Value of Shares = 100.
